

BRIDGE+MORE BY BRIDGE COMPANY

Remove dealer
calibration

At Bridge Company we are proud about our **Bridge+More** solution and our unique support options we offer to our users worldwide, such as:

- Internet bases full insight,
- Real time knowledge and effect of a change,
- Real time test,
- Detailed logs
- Autonomy for our users to make changes that might be required – or we can remotely do it for them if they ask for it.

When to do a calibration?

- If your dealer experience an increasing number of card read errors (89) or for example if the dealer read red cards better than blue cards.
- The **Bridge+More** dealer cannot read the code on each cards with the required precision.
- It can be due to the card codes, dirt on the cards or dirt in the 6 reader holes on dealer's center.

Please check the cards and blow gently on the dealer's holes.

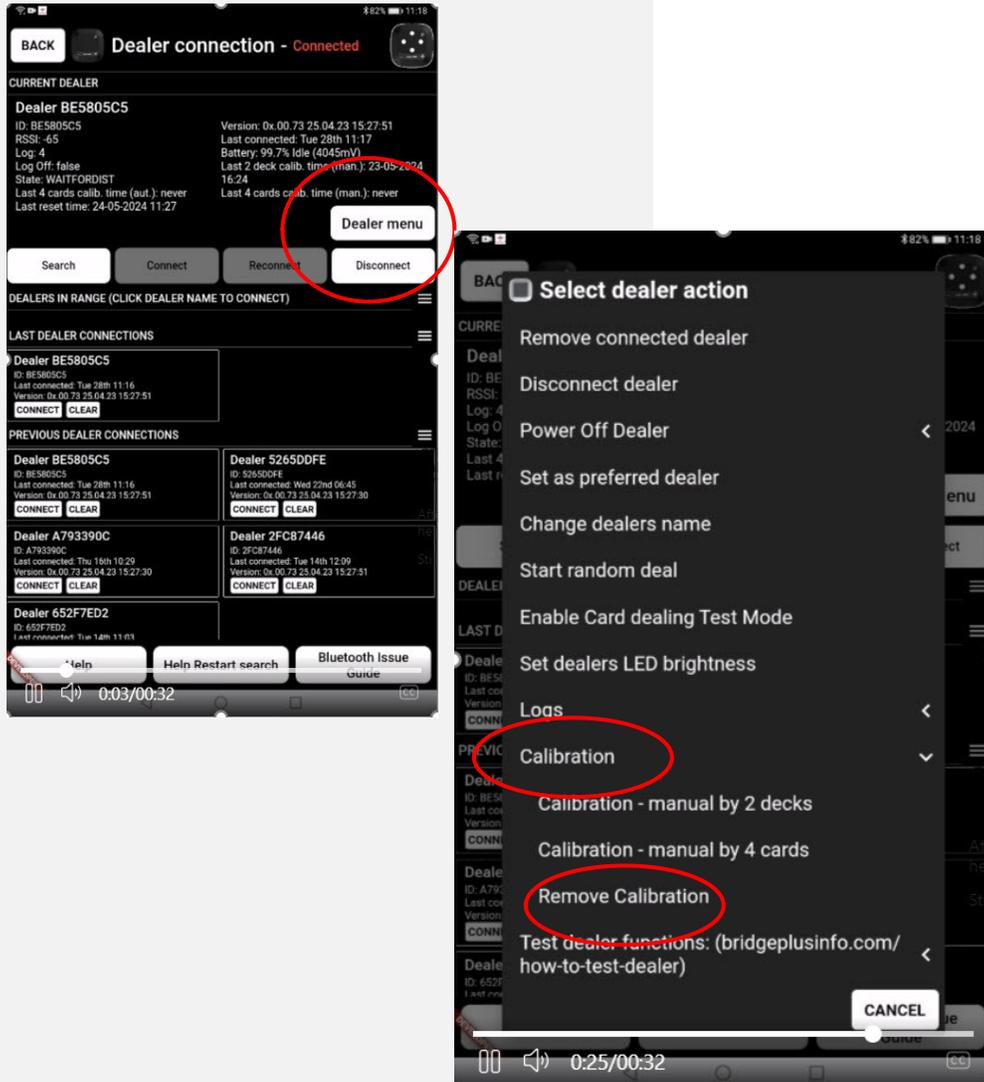

Remove calibration is to be used if neither 4 or 52 card calibration work / can be done successfully.

Please read more about it in [4 cards calibration](#) and [52 cards calibration](#)

Remove calibration MANUAL

BRIDGE+MORE^{BY BRIDGE COMPANY}

1. Access to your **Bridge+More app**.
2. Press **dealer connection** button.
3. **The dealer must be connected to the app.**
4. Press **Dealer Menu** button.
5. Press **Calibration**
6. Press **Remove calibration**.

After remove calibration then test if still does not work, please do a new [4 card calibration](#) and if this does not help then do a [52 card calibration](#) (two deck of cards)

Still not solves the issue, please contact us at info@bridgeplusmore.com

Thank you!
